## Gemma Architecture Assistant

Asks questions strictly against extracted static architecture

### GEMMA ASSISTANT

Hello! I'm ready to explain the architecture of **sample-project**. Try clicking one of the suggested prompts below or ask your own question!

Explain the overall request flow from controller to database.

### GEMMA ASSISTANT (DETERMINISTIC-RULES-ENGINE (OFFLINE FALLBACK))

#### Request & Architecture Flow:

- Controller Layer:** UserController handles incoming HTTP requests.  
↳ Calls Service: UserService
- Service Layer:** UserServiceImpl executes business logic and calls Repository UserRepository.
- Persistence Layer:** UserRepository persists/queries User entity.
